EDUCATION

University of Cambridge

Oct. 2023 – 2026 (Expected)

B. A. (Hons) in Computer Science

Cambridge, England

- **Grade: 1st Class.** Highest mark for Object-Oriented Programming. Top 5 in: Databases, Discrete Mathematics, Machine Learning & Real-world Data, Software & Security Engineering.
- Cybersecurity Society: Secretary (2024/25) – Represented the University in various international competitions.
 - * 1st place at pwnEd5 finals, hosted by the University of Edinburgh.
 - * 2nd place at the global finals of LakeCTF 2024, hosted by the Swiss Federal Institute of Technology Lausanne.
 - * 3rd place at European finals of CSAW CTF 2023, hosted by New York University.
- Hughes Hall May Ball Committee – Developed www.hughesmayball.co.uk and managed domain. *React · TailwindCSS*
- Hughes Hall IT & Infrastructure Officer (2024). Singapore Society Database Officer (2024/25)

EXPERIENCE

Open Government Products

Jun. 2024 – Present

Software Engineer Intern

Singapore

- Working on the organization's GitOps access control solution, which replaces previously ClickOps-heavy HR workflows.
- Shipped a Next.js app used by HR to visualize and preview changes to access control policies, reducing human error.
- Initiated and led a project to build open-source secure-by-default components used by developers in production systems and our starter kit template, making application security easy and invisible. Remediated a Next.js 0-day in the process.
- Configured CI/CD pipelines including automated NPM package publishing, changelog generation, documentation generation from TSDoc comments (published to a documentation website), testing and deployment.
- Initiated and configured advanced static code analysis pipelines across the organization. Wrote and published custom CodeQL query packs and libraries for data flow analysis on common technologies used, including Next.js, React, and tRPC.

Jane Street, Macquarie

Mar. 2024 – Apr. 2024

First-Year Trading & Technology Programme, Technology Spring Insight Programme

London, United Kingdom

Cure53

May 2023 – Present

Freelance Security Engineer

Berlin, Germany (Remote)

- Performed 15+ code audits and VAPTs for [global clients](#). Communicated findings to technical & non-technical audiences.
- Targets included web applications, browser extensions, Electron-based desktop applications, and mobile applications.

TikTok

Apr. 2023 – Sep. 2023

Security Engineer Intern

Singapore

- Discovered 50+ security vulnerabilities affecting critical internal and external facing services, such as TikTok.
- Developed Java extension on Burp Suite's new Montoya API for testing protobuf over both WebSockets and HTTP(s), a feature not supported by any open-source extension at the time of development.
- Wrote and deployed to K8s a deliberately vulnerable app in React and Express used as part of an internal competition.
- Researched at scale: Protobuf over WebSockets, XSS filter bypasses, and rich text editor vulnerabilities.
- Weaponised a 0-day in an online word processor to harvest employee credentials in a red team operation.

HACKATHONS & PROJECTS

[Echo](#) | *Next.js · TailwindCSS · Vercel · Reddit, Twitter API + OAuth*

- Most Promising AI x Web3 Build, 1st Prize @ Encode Club London AI Hackathon 2024
- Social media aggregator that provides personalised feed for users to regain control of their social media algorithms.

[EduAble](#) | *Next.js · TailwindCSS · PostgreSQL · Vercel · OpenAI API*

- 2nd Place @ Cambridge Generative AI Hackathon 2024, Finalist @ Fitzelerate 2024
- STEM notetaking app with real-time audio transcription to Markdown & LaTeX, and AI-generated summaries & quizzes.

[Ambrose](#) | *TypeScript · React · TailwindCSS*

- 1,200+ downloads.
- Chrome extension that automatically answers trivia questions and reminds users of pending trivia quizzes in an online game.

[Zeno](#) | *TypeScript · Express.js*

- Finalist @ STACK the Codes Hackathon 2022
- Security middleware for Express.js that protects against injection attacks, app-level DoS, SSRF and IDOR vulnerabilities.

- Most Impactful Award @ Tech For Good Festival 2021
- Chrome extension that helps people with disabilities and the elderly to navigate the web with ease by providing accessibility improvements.

PROFESSIONAL HIGHLIGHTS

Speaking Engagements

- *Client-Side Attacks in a Post-XSS World* – pwnEd 5 (University of Edinburgh), BSides Cymru/Wales, 2024.
- *XS-Leaks* – *Client-Side Attacks in a Post-XSS World* – BSides London, 2023.
- *HTTP Request Smuggling in the Multiverse of Parsing Flaws* – BSides Singapore, 2022.
- *Learn Hacking Through CTF Competitions* – Division Zero Bug Bounty Quarter, 2022.

Cybersecurity Vulnerability Research & Bug Bounty

2022 – 2023

- Discovered security vulnerabilities in popular open-source software. Credited for 15 vulnerabilities in the CVE database.
- Performed penetration tests for global companies through the HackerOne platform, uncovering > 50 valid security issues.
 - * Achieved maximum lifetime signal-to-noise rating across multiple private & public programs, with zero invalid reports.
 - * Competed against top hackers from around the world and emerged as top bug bounty hunter in the invite-only Ministry of Defense Bug Bounty Programme 2022 and GovTech Government Bug Bounty Programme 2023.

Cybersecurity Competitions

2022 – 2023

- Founded Social Engineering Experts, the top Singapore computer security Capture the Flag (CTF) team in 2022 and 2023.
- Core member and web security player for Blue Water, the global top CTF team in 2023. Finalist @ DEF CON 31-32 CTF.
- Led organization of SEETF, a global competition with >2,000 players and near-perfect public voting scores in 2022-23.
- Built cybersecurity challenges attempted by thousands of players in competitions and on platforms such as Hack The Box.

TECHNICAL SKILLS

Languages: TypeScript · Python · Java · OCaml · Go · SQL · L^AT_EX

Frameworks: React · Next.js · TailwindCSS · Prisma · Flask · Django

Developer Tools: Git · Docker · Vagrant · Google Cloud Platform · Kubernetes · Unix

Cybersecurity Certifications: OSCP · OSWE · CRT · Burp Suite Certified Practitioner

HONOURS & AWARDS

<i>Name</i>	<i>Placing</i>	<i>Type</i>	<i>Scope</i>	<i>Awarder</i>	<i>Year</i>
Encode Club London AI Hackathon	1 st Place, AI x Web3 Build	Hackathon	Global	Encode Club	2024
Cambridge Generative AI Hackathon	2 nd Place	Hackathon	UK	GetSeen Ventures	2024
HackSingapore	Finalist (Top 3)	Hackathon	SG	Tribe	2022
STACK the Codes Hackathon	Finalist (Top 7)	Hackathon	SG	GovTech	2021
Tech For Good Festival	Most Impactful	Hackathon	SG	Engineering Good	2021
Today I Learned AI Camp (University)	4 th Place	AI Hackathon	SG	DSTA	2021
Government Bug Bounty Programme 8–9	Top Bug Bounty Hunter	Bug Bounty	Global	GovTech	2023
MINDEF Bug Bounty Programme	Top Bug Bounty Hunter	Bug Bounty	Global	MINDEF	2022
LakeCTF	1 st (Finals)	Security CTF	Global	EPFL	2024
BSides Cymru/Wales Community CTF	1 st Place	Security CTF	UK	Admiral	2024
